Inspirational Staircases

Timber Balustrade

Nothing comes close to the warmth and feel of timber handrails and balustrades.

Oak can provide the modern feel to any staircase, whilst the use of Black Walnut or Cherry creates that luxurious touch.

And whether you are looking for straight cut or intricately turned spindles.

Metal Balustrade

The use of metal balustrading opens up a wealth of design opportunities from the simple contemporary look to full ornamental balustrading – or a combination of both.

Choose from a range of finishes to create the perfect look for your project from polished or brushed steel to painted.

The growing popularity to combine metal balustrades with timber handrails to achieve a superb finish.

Glass Balustrade

Glass balustrading provides the quintessential contemporary finish to any staircase.

The use of glass as balustrading can either be in a panel format supported by metal or timber supports or as structural glass.

Either format can be completed with a timber handrail fitted straight onto the glass or the panel system can incorporate a core rail to support the handrail.

The glass can be supplied either clear or opaque and can be set off with lighting to create a unique finish.
